

➤ “SQF-CON aims”

The project aim: developing a Sectoral Qualifications Framework for the construction industry in Europe and making it work in the entire sector. The SQF will serve as a frame of reference for qualifications, knowledge, skills and competence in national construction industries.

➤ “2nd international SQF-CON Meeting in Ettersburg”

During the 9th and 10th of October 2008, the international project consortium met in Ettersburg. Having discussed the present results, all participants decided to reassign the matrices, in order to get a better overview: the content of the matrices’ columns *knowledge*, *skills*, *competence* were attached with sub headlines, in order to improve the clarity.

➤ “1st SQF-CON Conference on 20th of January 2009”

To disseminate the results, which have been worked out during the project until now, a first European SQF-Conference will be held in the frame of a FIEC-Meeting with participants of all affiliated organisations of FIEC from EU-Member States as well as other national and international institutions and organisations in charge with VET in construction. The 1st conference will take place in

Confédération Construction

34-42 rue du Lombard
