Title: *Online support for EU Construction workers and trainers mobility*

Background / reason

EU countries and employers represent needs to solve the problem of insufficient harmonization of training and lack of knowledge regarding specific equivalences.
In a nutshell this means: workers are looking forward to moving to other EU countries, EU countries and their companies are looking for hiring qualified, specialized workforce.

Main aim

Develop an innovative information tool specialised in the construction sector to facilitate qualification and mobility of trainers and workers around **Europe**.

AIDICO
TECHNOLOGICAL INSTITUTE
OF CONSTRUCTION

Specific objectives

✓ providing updated comparative information regarding qualifications and skills, training paths, accreditations and certifications, administrative and cultural information in a simple manner for foreign workers / trainers in the construction sector

✓ enhancing the information flow between employers, training institutions and potential employers and trainers among the project partners

✓ creating an innovative online tool to facilitate access to information mentioned in the items above

✓ achieving maximum acceptance and use the tool among potential users

AIDICO
TECHNOLOGICAL INSTITUTE
OF CONSTRUCTION

✓ **Transfer of Innovation**

The project will impact the VET systems by improving qualification transparency with an innovative resource to promote contact between labour market and VET and thus enhance mobility

✓ **Innovative results the project is based upon**

The project is based upon the transfer mainly of **YESProject** result by **TEEMPASS**, but will also apply results and methodology of **SQFCon** by **BFW BAU**.

TOP Products...1/3

✓ Partner from Malta will export **TEEMPASS** (output of *YesEmployability*) to the consortium, which is composed of organizations from the construction sector. They will adapt the idea and methodology from the Tourism and Hospitality sector to the Construction sector.

✓ **SQF-CON** was developed in a German project and its contents and methodology will be transferred to all the project countries

Transfer: SQF-CON

Structure

Developing and introducing a

Sectoral **Q**ualifications **F**ramework for the European **Con**struction Industry"

Acronym: SQF-CON,
LdV-Project «137865-LLP-2007»-«DE-KA1EQF

… a standardized frame of reference for qualifications, knowledge, skills and competences in national construction industries.

TOP Products...3/3

✓ **InterCom-e-SWOT** was developed by a consortium from Germany, Netherlands and Sweden and its conclusions will be considered when developing **BuildOut** in the project countries

✓ The project has aimed at a basic surveying of the existing products and services in eLearning as well as traditional preparatory learn arrangements for people going into a different culture abroad for a limited period.

✓ Partners of InterCom-e-SWOT have dealt with methodology of analysis with Strengths and Weaknesses, Opportunities and Threats when gaining Intercultural Competences mostly connected to e-Learning.

EUROPEAN ADDED VALUE

✓ **BuildOut** has been designed as a response to the new challenges arisen in the EU regarding geographical mobility of trainees and workers in the construction sector, which cause specific problems in the project countries but also in the entire European territory and beyond.

✓ Main benefits of the **BuildOut** implementation are based on the fact, that these challenges require a European approach. Cooperation is needed between the different countries to reach a level of transparency needed in the training and qualification systems, as well as to create a framework suitable to enhance qualitative mobility between different countries´ citizens.

✓ **BuildOut** will be a future reference for an improvement of the European Educational System and Innovation in mobility strategies

Workplan

5 project coordination meetings have been planned in order to keep track with the technical achievements as well as with the financial state of the project

Project meeting **1,** 5.-6.11.2012
Kick-off meeting in Valencia, Spain

Project meeting **2,** 14.-15.05.2013
First Steering meeting in Kerpen, Germany

Project meeting **3,** October 2013
Second Steering meeting in Groningen, Netherlands

Project meeting **4,** April 2014
Third Steering meeting in Warrington, United Kingdom

Project meeting **5,** September 2014
Final meeting in Istanbul, Turkey

Work packages and timelines with results

Work package number 1

Start month 10/2012 – End month 09/2014

Results: Minutes of coordination meeting
Road Map of the project activities

Work package number 2

Start month 10/2012 – End month 03/2012

Results: Database contents including the following information for each project countries and each projected profession and in all project languages – skills and competences, training paths, accreditation and certificaticates, centres offering the training and certification services

Work packages and timelines with results

Work package number 3
Start month 06/2012 - End month 12/2012

Results: Buildout online practical **INFORMATION KIT**

Work package number 4
Start month 12/2012 - End month 03/2014

Results: BuildOut data base and website

Work package number 5
Start month 12/2013 - End month 09/2014

Results: Adverts section for jobs, work placements and courses

AIDICO
TECHNOLOGICAL INSTITUTE
OF CONSTRUCTION

Work packages and timelines with results

Work package number 6
Start month 10/2012 - End month 09/2014

Results: Dissemination and valorisation strategy, project website, logo design and project image, dissemination material (brochure), endorsement activities, final dissemination activities, dissemination articles (printed/online media)

Work package number 7
Start month 10/2012 - End month 09/2014

Results: Evaluation and Quality Assurance Plan, a questionnaire template to evaluate website; web statistics

Summary

BuildOut will produce a multilingual platform containing:

✓ an online database with updated comparative information regarding qualifications and skills, learning paths, accreditations and certifications

✓ a practical information kit for constructions workers / trainers on the move

✓ a transnational advertisement section, where positions for jobs / placements / courses for target groups are available
